MEMORANDUM NUMBER 319

RECHECK OF POLLUTION FROM WESTERN GAS COMPANY,

BREMERTON

To: Nathan Fasten, Chief Biologist

From: Joe Lobberegt, Investigator

Another visit to the Western Gas Company at Bremerton, Washington was made on Monday, February 3, 1947, by Investigator Joe Lobberegt to check and see if conditions had improved any since the last call made at this plant.

Upon arrival at this plant an extensive oil slick about 20 feet wide was in evidence coming from their waste water sump.

Mr. Leo Campbell, manager of the concern, was then contacted and he gave assurance that a competent engineer would be consulted to see what steps could be taken to prevent this oil from entering the waters of Washington Narrows.
